+91-7797250490 | aranyajana01@gmail.com | [linkedin.com/in/aranyajana](https://www.linkedin.com/in/aranyajana) | [Github](#) | [Portfolio](#)

PROFILE

Skilled in Python, C++, JavaScript, HTML, and CSS, with hands-on experience in Machine Learning using NumPy and Pandas. Knowledgeable in Software Development, Quality Assurance and Software Testing, eager to contribute effectively.

EDUCATION

Narula Institute of Technology

Kolkata, India

B. Tech. in Computer Science and Engineering (AIML)

2021 – 2025

- CGPA: 7.6
- Relevant Subjects: AI ML Foundation, Data Structures & Algorithms, Probability, Statistics etc.

Higher Secondary (12th) - Percentage: 94.6

2019 – 2021

Secondary (10th) - Percentage: 88.28

2013 – 2019

SKILLS

Languages & Frameworks: Python, C++, SQL, JavaScript, HTML, CSS | React, Node.js, Django, FastAPI, WordPress

Tools & Libraries: Git, Kaggle, Docker, Cloud Platforms, VS Code, Visual Studio | TensorFlow, Pandas, NumPy, Matplotlib

Testing & Documentation: Web Scraping, Test Case Design, Bug Reports, Test Plans, MS Word, Excel, PowerPoint

EXPERIENCE

Research on Cyberbully Detection Using Machine Learning

Final Year Research Paper

Nov 2024 – Expected completion: April 2025

- Exploring BART and ML models (SVM, Random Forest, Neural Networks) for cyberbullying detection.
- Utilizing NLP for text preprocessing, sentiment analysis, and feature extraction.
- Optimized BART models to enhance accuracy and reduce prediction time.

Python Development Intern

Pinnacle Labs

July 2024 – Aug 2024

- Integrated RESTful APIs for real-time data processing and seamless user experience.
- Developed a weather app with 99.9% uptime and sub-200ms response time.

PROJECTS

AI Image Generation App | APIs, MongoDB, Express, React, and Node.js

[LINK](#)

- Developed a full-stack AI-powered image generation web application using the MERN stack and integrated APIs.
- Implemented secure Google login functionality and payment processing using Razorpay.
- Designed and developed a credit-based system to manage and track user-generated content.

Log Analysis Script in Python | Python, Log Analysis, Scripting

[LINK](#)

- Developed a Python script to analyze log files for cybersecurity insights.
- Applied file handling, string manipulation, and data analysis techniques.

Credit Card Default Prediction | Machine Learning, Python, Pandas, Scikit-Learn, Data Analytics

[LINK](#)

- Developed a high-accuracy ML model for credit card default prediction using advanced data preprocessing and feature engineering.

Technical Expertise

DBMS • Agile Software Development • CI/CD Pipeline • Strong Communication • Object-Oriented Programming
